

The fail-safe Electromagnetic Lock is uses magnetic force to secure and release the doors, suitable for use in areas which require access controlled or egress such as exit door.

Besides, the electromagnetic locks are totally seal in an epoxy filled stainless steel housing for water resistance and vandal resistance purpose.

We offer up to 1200 pounds holding force with jumper pin selectable for 12V or 24V DC dual input voltage and can be applied with access control, and with the full range of optional brackets, it can be installed on any type of door frames such as narrow door frame, in-swinging door and glasses door.

It is the best choice for electronic security industry and system integrators.

## FEATURES :

- MOV provides spike and surge protection PCB.
- Magnetic bond sensor monitors output.
- Bi-color LED indicates lock/unlock status.
- Threaded conduit fitting design.
- Unique dual sides intallation design.
- Heavy duty stainless steel housing for vandal resistance.
- All parts sealed for water resistance.
- Dual voltage 12VDC or 24VDC (selectable).
- Anti-residual magnetism designed.
- Complete mounting hardware included.
- Low Current Consumption.
- Reliable Holding Force.
- Full range of optional Brackets.

## SPECIFICATIONS :

- Voltage Input: 12 VDC / 24 VDC
- Current Draw: 500mA /12VDC; 250mA/24VDC
- Holding force: Up to 1200lbs(545 kg)
- Dimension:  
Magnet - 222(L) x 62(W) x 42mm(T)  
Armature Plate - 185(L) x 61(W) x 17mm(T)
- Special Finishes for magnet and armature plate : Zinc
- Epoxy sealed surge
- Weight (approx): 4.5 Kg

Electromagnetic Lock

Armature Plate
